**FOR IMMEDIATE RELEASE**

## **Polarion Software Continues Backing for Subversive Team Provider**

**Research Triangle Park, North Carolina, March 13, 2008** — Polarion Software Inc., creators of fully integrated application lifecycle management solutions and Subversion services, announced continued support for the Subversive Team Provider project.

"Subversive is a major focus of our company's open source initiatives aimed at making Eclipse and Subversion function together in ways that add value for the enterprise, said Polarion CEO Michael Carey. "We see the future of commercial software development being firmly rooted in open source solutions like Eclipse and Subversion, to the extent that we have deeply committed to them as the basis for Polarion's commercial application lifecycle management solutions. In addition open source initiatives like Subversive, Polarion has supported Eclipse developers since 2006 with a free issue tracker plugin for the Eclipse IDE - another example of Polarion's expertise in synergies with Eclipse and Subversion."

"Polarion is a valued member of the Eclipse Foundation," said Mike Milinkovich, the foundation's Executive Director. "Their approach exemplifies how commercial companies can contribute in tangible ways to the open source community, and how open source communities and commercial software vendors can both benefit by working together to deliver the best of both approaches."

Polarion will sponsor the long talk "Subversion and Subversive: Taking Advantage", by Subversive project lead Igor Vinnykov, at EclipseCon 2008 on Wednesday, March 19 at 3:30 pm. Among other subjects, the talk will discuss how Eclipse developers can use Subversive to integrate with Subversion in their projects. Vinnykov will also lead a Polarion-hosted BOF (birds of a feather) session on Monday evening, March 17 at 7:30 pm for any and all topics around Subversion and Eclipse.

More information about Polarion Software's free and open source tools and solutions for Eclipse and Subversion are available at
