FOR IMMEDIATE RELEASE

Polarion Software Launches Subversion and ALM Workshops in the U.K.

London, England, January 29, 2008 — Polarion Software, creators of fully integrated application lifecycle management solutions and services based on Subversion, will launch two workshop series in the United Kingdom: *How to Ramp Up to Subversion Fast* and *Application Lifecycle Management with Subversion*.

The Stuttgart, Germany based software company has been conducting these workshops regularly in Germany and other European countries for the past two years. According to Polarion CEO Frank Schröder, Forrester Research's (www.forrester.com) report *Software Change and Configuration Management, Q2 2007* (May 29, 2007), which cited Subversion as the leading stand-alone SCM solution, sparked widespread interest in the open source version control system, touted by many as the definitive replacement for CVS. As a result, Polarion Software has seen an increased demand for these workshops.

Having recently established a UK subsidiary, Polarion Software UK, Ltd., the company is now launching the workshops in the United Kingdom. The first workshops will take place at 107-111 Fleet Street, London on February 1, 2008. The company plans to offer the sessions approximately every six weeks throughout the year. Cost of each workshop is £79.00 (GBP).

Subversion Workshop

Registration begins at 08:30 a.m. and the session runs from 09:00 a.m. to 1:00 p.m. Topics covered include:

- Why Subversion?
- Concepts, Installation and configuration of Subversion
- Integration of Subversion with existing development environments
- Subversion interfaces: Command Line, GUI, TortoiseSVN, and others
- Migration from existing version control systems
- Branching, Tagging, Staging, and Hook Scripts
- Setting up multi-site Subversion repositories
- Tips & Tricks, useful Tools

A “Come Together” business lunch is included in the workshop price.

ALM Workshop:

Registration begins at 1:00 p.m. and the session runs from 1:30 p.m. to 4:00 p.m. A “Get Together” session will follow the close of the workshop.

A random drawing will be conducted at each workshop, and a free license for Polarion® ALM Team - the company’s Subversion-based application lifecycle management platform for engineering teams, valued at £1,435 (GBP). All participants will get access to several of the company’s free and open-source tools for Subversion, including *SubTrain* – the first open source training curriculum in the industry designed to help train Subversion trainers and others getting started with Subversion.

Information and advance registration are available online:

- **Subversion workshop:**

Registrants can sign up at the above URLs. Payment will be taken at the entrance.

Those unable to attend this workshop may take advantage of a series of webinars offered by Polarion Software demonstrating how the power and potential of Subversion can be extended to provide a comprehensive platform for efficient management of the full software lifecycle.

Information is available at www.polarion.com/products/alm/demo_registration.php.

About Polarion Software

Polarion Software is a global leader of comprehensive application lifecycle management (ALM) solutions and services aimed at improving efficiency and productivity in distributed development environments. Polarion ALM for Subversion combines every major phase of managing the software development lifecycle into one comprehensive ALM platform that provides teams with the real-time information on the actual state of software development in their organization necessary to make intelligent, informed decisions, while leveraging Subversion and other advanced open source technologies to deliver unique functionality and a significant return on investment. Additional information is available at www.polarion.com.
